

Ecma's Response to Harmonising

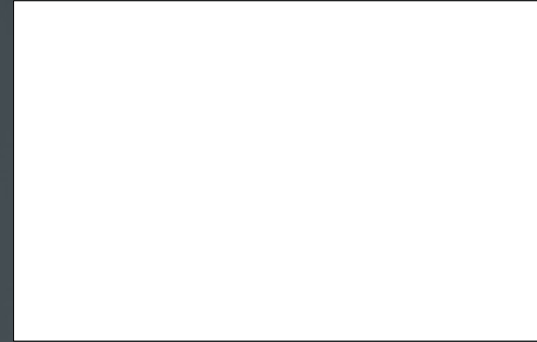

- Taken from page 7 of <http://www.computerworld.com/pdfs/Ecma.pdf> which lists specific issues that Ecma see with merging the standards.
- matthew@holloway.co.nz

Ecma's points

1. “Differences between the implicit page style model of ODF and the explicit page style model of OpenXML,”
2. “differences in the models for splitting table cells,”
3. “differences in the style information associated to spreadsheet cells”
4. Spreadsheet Formulas

1. Page Style Model

- "Implicit" vs "Explicit"

Can this feature be harmonised?

- Yes, this is an understood feature request.

2. “differences in the models for splitting table cells,”

- Nested tables

	<table border="1"><tr><td></td><td></td></tr><tr><td></td><td></td></tr></table>				

3. “differences in the style information associated to spreadsheet cells”

Can any techy harmonise these?

- Yes, **any** techy can harmonise these.

OASIS certainly can.
